

MiniXtend® HD Cable, LT, A-DQ(ZN)2Y

6x24 E9/125 Ultra 200

CORNING

Corning® MiniXtend® HD cables are high-density micro cables that are up to 60 percent smaller and up to 70 percent lighter than standard loose tube cables and up to 20 percent smaller than standard micro cables. MiniXtend HD cables have an SZ-stranded loose tube construction and provide high fibre counts in limited duct space in long-haul, metro and access networks.

With a dual-layer tube design and a low-friction PE sheath, MiniXtend HD cables are optimised for blowing into microducts.

Both the buffer tubes and the fibres contained within are colour-coded for quick and easy identification.

MiniXtend HD cables feature Corning® SMF-28® Ultra 200 single-mode fibre (ITU-T G.652.D and ITU-T G.657.A1): the industry's first 200 micron fibre with a 9.2 micron Mode-Field Diameter (MFD).
