

## Thermosiphon J Series

### Description

The Solahart J Series is a roof mounted, closed circuit system specifically designed to provide efficient service in medium to high solar gain areas.

The high efficiency black polyester powder coated absorber maximises the transfer of available solar energy while the closed circuit design makes it suitable for frost prone and poor water quality areas.

The J Series utilises Solahart's revolutionary multi-flow collector which uses a huge 35 risers to extract the maximum amount of energy from the sun.

The double ceramic lined tank has a protective sacrificial anode, and the J Free Heat features additional anode protection. The tank is equipped with an electric booster, alternatively an in line gas booster is available.

Most J and J Free Heat systems can be installed with the HartStat OTP (over temperature protection) system to prevent over performance during periods of higher solar radiation and lower hot water draw off.

### Key Features

- Optimum performance in medium and high solar gain areas
- Suitable for frost prone or harsh water areas
- Stylish slimline design
- Thermosiphon operation minimises maintenance
- Gas booster or electric booster models available
- Double coated ceramic lined tank
- Enhanced protection on Free Heat model
- Free Heat series available in 180 and 300 litre capacities

### Key Benefits

- Can save up to 50% to 85% of water heating energy consumption\*
- Reliable, low maintenance operation
- Hot water regardless of the weather
- Qualifies for valuable environmental incentives\*
- Reduced energy use can save up to 1.9 to 3.2 tonnes of CO<sub>2</sub> emissions per annum\*
- Peace of mind with 10/5/5 (J Free Heat), 5/5/5 (J Series) year warranties†

\* Energy savings of up to 50% to 85% shown are based on Australian Government approved TRNSYS simulation modelling using a medium load. Savings and incentives will vary depending upon your location, type of Solahart system installed, orientation and inclination of the solar collectors, type of water heater being replaced, hot water consumption and fuel tariff. Maximum financial savings off your hot water bill are achievable when replacing an electric water heater on continuous tariff. Refer to [solahart.com.au](http://solahart.com.au) for further information.

† Solahart Warranty Details: 10/5/5 warranty, 10 year cylinder and collectors supply, 5 year parts, 5 year labour; 5/5/5 warranty, 5 year cylinder and collectors supply, 5 year parts, 5 year labour.

# Thermosiphon J and J Free Heat Closed Circuit Systems

These systems are suitable for multiple installations. They are suitable for frost and harsh water regions.

\* An additional 0.9m (35.4in) should be left on all four sides of the installation for safe access and servicing.

NA - Not available.

The J and J Free Heat systems (if installed with a HartStat OTP system) can be installed as a solar preheater with an inline Solahart gas booster water heater. Refer to the Solahart gas booster specification sheet for further details on the gas booster.

**Energy Tip:** When installing your solar water heater, install minimum 3 star rated shower roses and flow restrictors to your taps if you don't already have them. This will not only save water but make your solar savings go further.
